

EMPOWER YOUR WORKFORCE WITH A DIGITAL WORKSPACE

Access to a few key applications on a smartphone doesn't enable your workforce to be as mobile and efficient as they need to be. At Emergent Networks, we can help you improve the way you manage and deliver the apps, data, and IT services your workforce needs to be productive – without sacrificing security or IT control.

INTRODUCING VMWARE WORKSPACE ONE

Workspace ONE is a simple and secure platform that manages and delivers applications on any desktop, tablet, smartphone, or laptop. It's helping organizations create digital workspaces for their workforce, modernize their IT operations, and better support their dynamic, mobile workforce.

ANY APPLICATION (Internal or External)

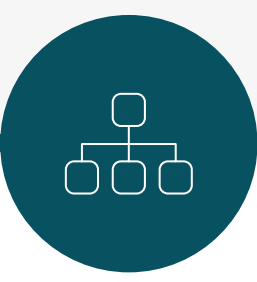

- Legacy
- Windows
- Mobile
- On premises
- Cloud-based

VMWARE WORKSPACE ONE

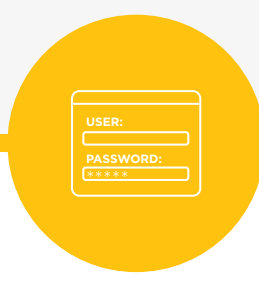

A unified platform for the provisioning, management, and policy enforcement of all applications across all devices

ANY DEVICE (BYOD or Corporate)

- Desktop
- Tablet
- Smartphone
- Laptop

Create digital workspaces so your workforce can go to one place for their apps and data, regardless of device

Users can securely access their digital workspace anywhere through a simple single sign-on

IT can establish granular security and access policies based on the user, device, data, location or app

HOW ARE ORGANIZATIONS BENEFITTING?

With Workspace ONE, organizations are increasing security, streamlining operations, and enabling their workforce to be more productive no matter where, when, and how they work.

SELF-SERVICE CATALOG

A self-service app catalog provides users with simple access to the applications they need

FAST ON-BOARDING

New employees can on-board and be productive on any device within an hour

INCREASED SECURITY

Two-factor authentication and conditional access can help you protect sensitive data

WINDOWS 10 MANAGEMENT

Manage Windows 10 desktops and automate Windows 10 user onboarding

EMERGENT NETWORKS IS YOUR DIGITAL WORKSPACE EXPERT
